CSWC Operational Period Summary

1800 November 18 2016 to 0600 November 19 2016

Cooler surface water temperatures near the equator indicate La Niña is in effect which increases the chances of warmer and drier weather for the southern United States

Cal OES SOUTHERN REGION

Jet Fuel Release, Point Mugu Naval Air Station, Ventura County, SPILL: 16-6999

On 11/18/16 at 0637 hours the California State Warning Center (CSWC) received a report from the U.S. Navy Regional Dispatch advising that a release of Aviation Fuel (JP-8) occurred at the Naval Air Station Point Mugu, Ventura County.

- The release occurred when a tanker truck collided with a barrier at the main gate at the Naval Air Station.
- The California Department of Fish and Wildlife advised that the tanker was a two tank truck. The first tank had all of the fuel removed from it and the second tank released approximately 1,556 gallons of fuel.
- The release entered a storm drain, but the amount released to the storm drain is unknown. The release impacted Mugu Lagoon Wetlands.
- Cal OES Southern Duty Officer (SDO) confirmed that Ventura County Emergency Operations Center (EOC) is not activated for this incident
- At 1743 hours, the Cal OES Law Duty Officer (LDO) advised that per the Cal OES Territory Representative the area has been re populated and evacuations lifted.
- At 2000 hours, the Cal OES Fire Duty Officer (FDO) advised that USCG (United States Coast Guard) and assisting agencies continue to monitor the remediation efforts in regards to the wetland clean up.
- The CSWC made all notifications per SOP and Cal OES Duty Officers will continue to monitor the situation.

WEATHER OF CONCERN

Weather of Concern

- A Flash Flood Watch for portions of San Bernardino County will be in affect from 11/20/2016 0600 hours until 0300 hours on 11/21/2016. This will affect portions of burn scar areas of:
 - The Blue Cut Fire near the Cajon Pass
 - The Pilot Fire near Silverwood Lake
- A Pacific frontal system will be moving through Northern California over the weekend bringing moderate rain and mountain snow to most of the north state. Gusty winds will also accompany this system.
- A Red Flag Warning is in effect until 1500 hours today for areas in Los Angeles and Ventura Counties due to gusty Santa Ana winds which will cause widespread drying.

Active Weather Warnings, Watches and Advisories by County:

http://www.wrh.noaa.gov/sto/brief/www_bc_cal.php

WEATHER SYNOPSIS BY REGION

NORTHERN CALIFORNIA

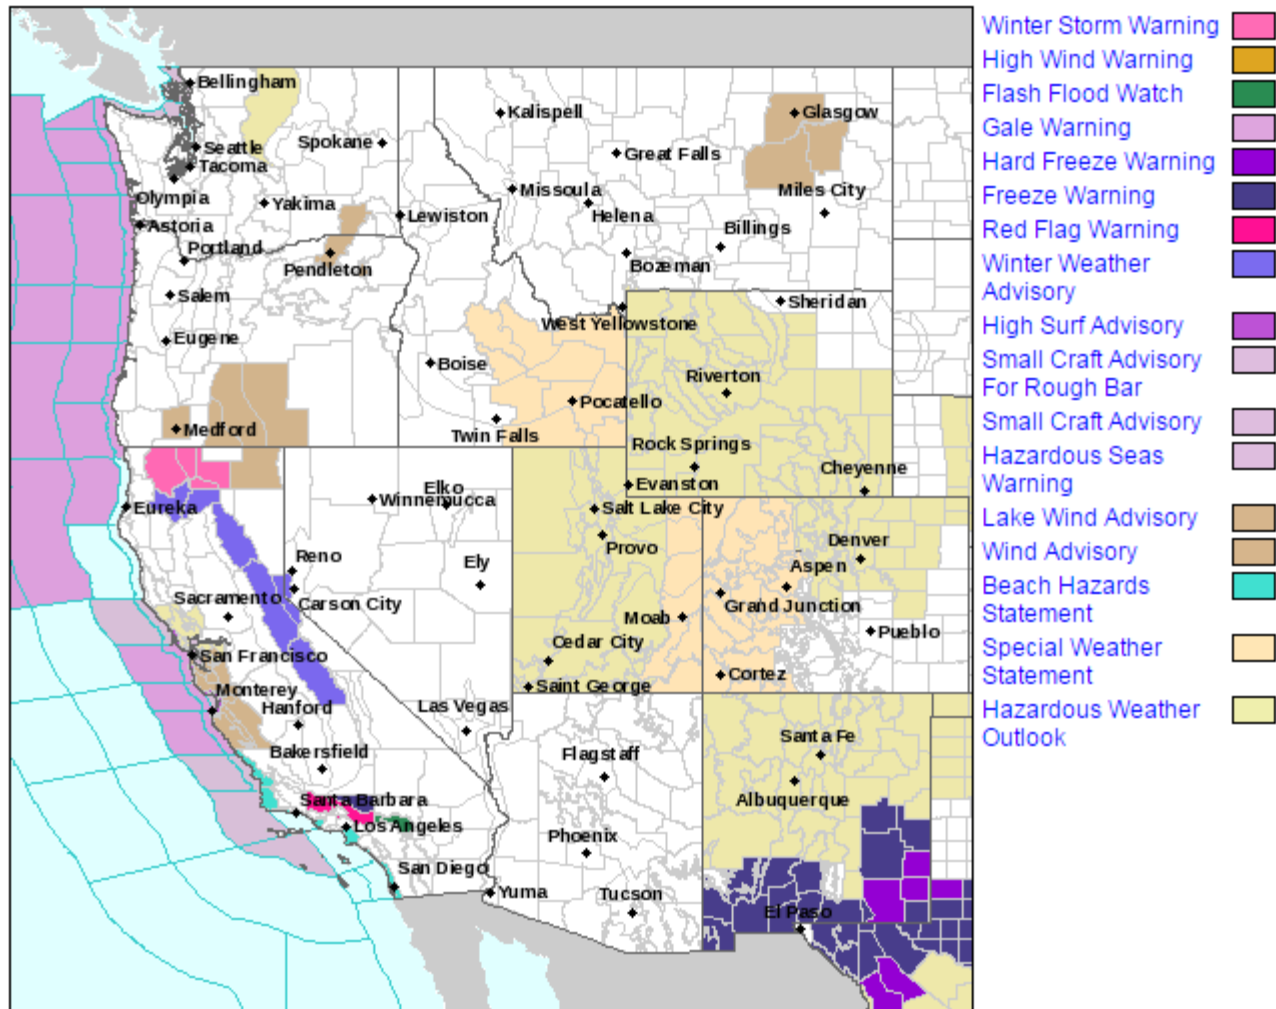

Rain or snow will hit all areas of the region over the weekend. Only light precipitation is expected Monday, but overall cool, moist and rather cloudy conditions will prevail. Without much of a break between systems, light precipitation is expected again Tuesday into next Wednesday, especially in the northern areas. There is still a lot of uncertainty about the details of the Thanksgiving holiday period/weekend, but it appears likely that some inclement weather should be expected then. Daily max temperatures will mostly be just below seasonal averages for the next 7 days. Some gusty southerly winds will develop this afternoon ahead of the incoming weather system and continue today. Somewhat lighter wind speeds are expected today. The lowest snow levels with these systems will vary, but will basically be from 3500-5000 feet in the north and 5500-7000 feet in the south. Some snow accumulation is expected at the lower elevations of those ranges as well with more significant amounts at the higher elevations.

SOUTHERN CALIFORNIA

This weekend, a strong low pressure area off the Pacific Northwest coast will spin a pair of troughs into the area. The first trough will reach the central coast and the Sierras north of the Sierra National Forest today, bringing widespread rain and mountain snows. Expect up to 2 inches of rain along the central coast from northwest San Luis Obispo northward and an inch of rain in the Sierra Foothills north of Fresno County today into tomorrow morning. The Sierras north of Yosemite National Park may see up to a foot of snow. Snow levels may fall to 6,500 feet by this afternoon. The front will likely wash out before reaching Southern California, but a second trough will likely bring rain to areas south of Pt. Conception tomorrow night into Monday morning. Rainfall over Southern California may range from 0.25" – 0.50" with higher amounts in Ventura and Santa Barbara County. Temperatures this weekend will be significantly cooler with highs in the 60s at lower elevations to the 30s and 40s in the mountains. Warmer weather may return for early next week, but another storm may bring precipitation to the northern half of the state by next Thursday.
